# Synergy Order App - Connecting a Network Receipt Printer

This guide shows you how to connect a Wi-Fi/LAN printer to the Synergy Order App for kitchen slips and receipts, and how to print a test slip.

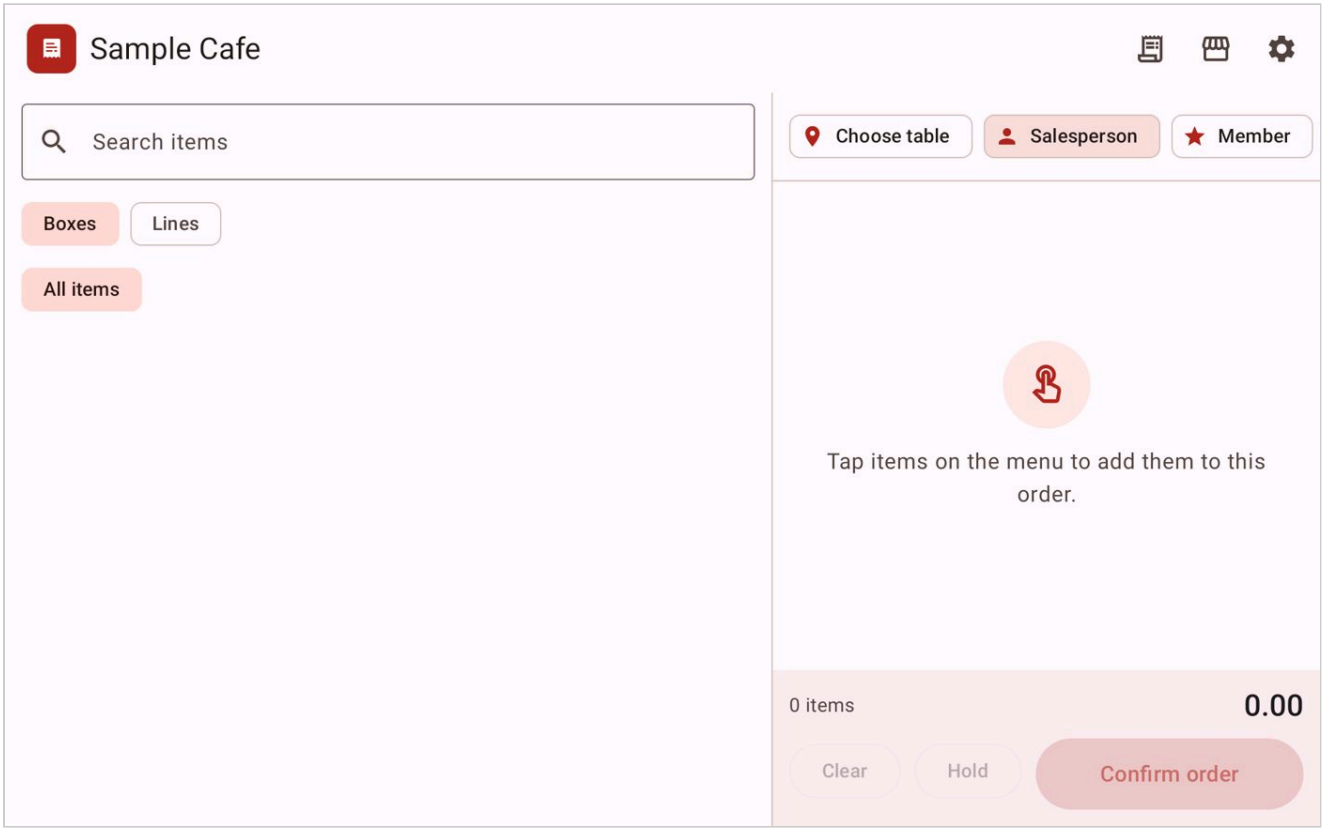

## Before you start

- Find out your printer's IP address.

## Steps

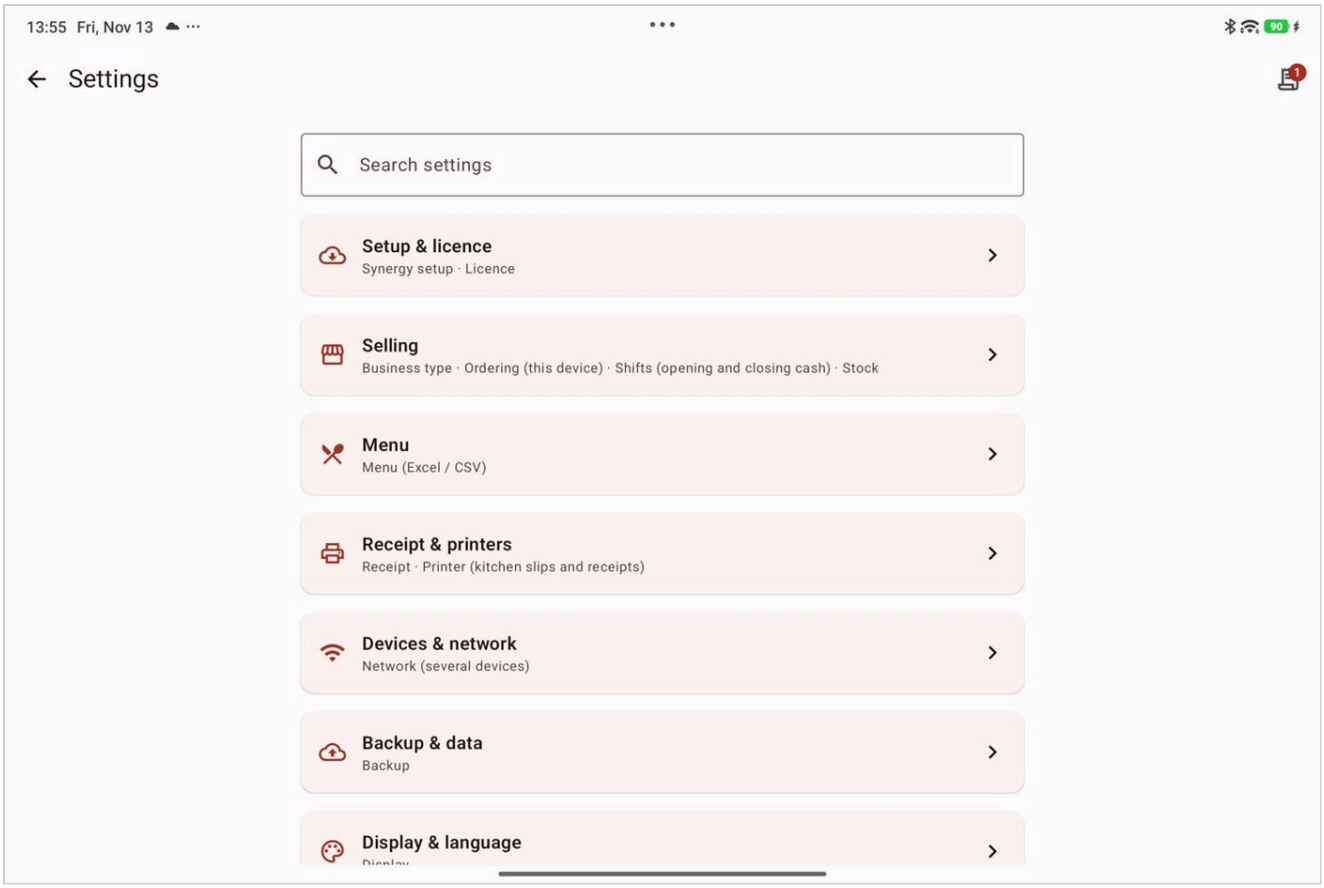

### 1. Start on the order screen

Open the Synergy Order App. You will see the order screen.

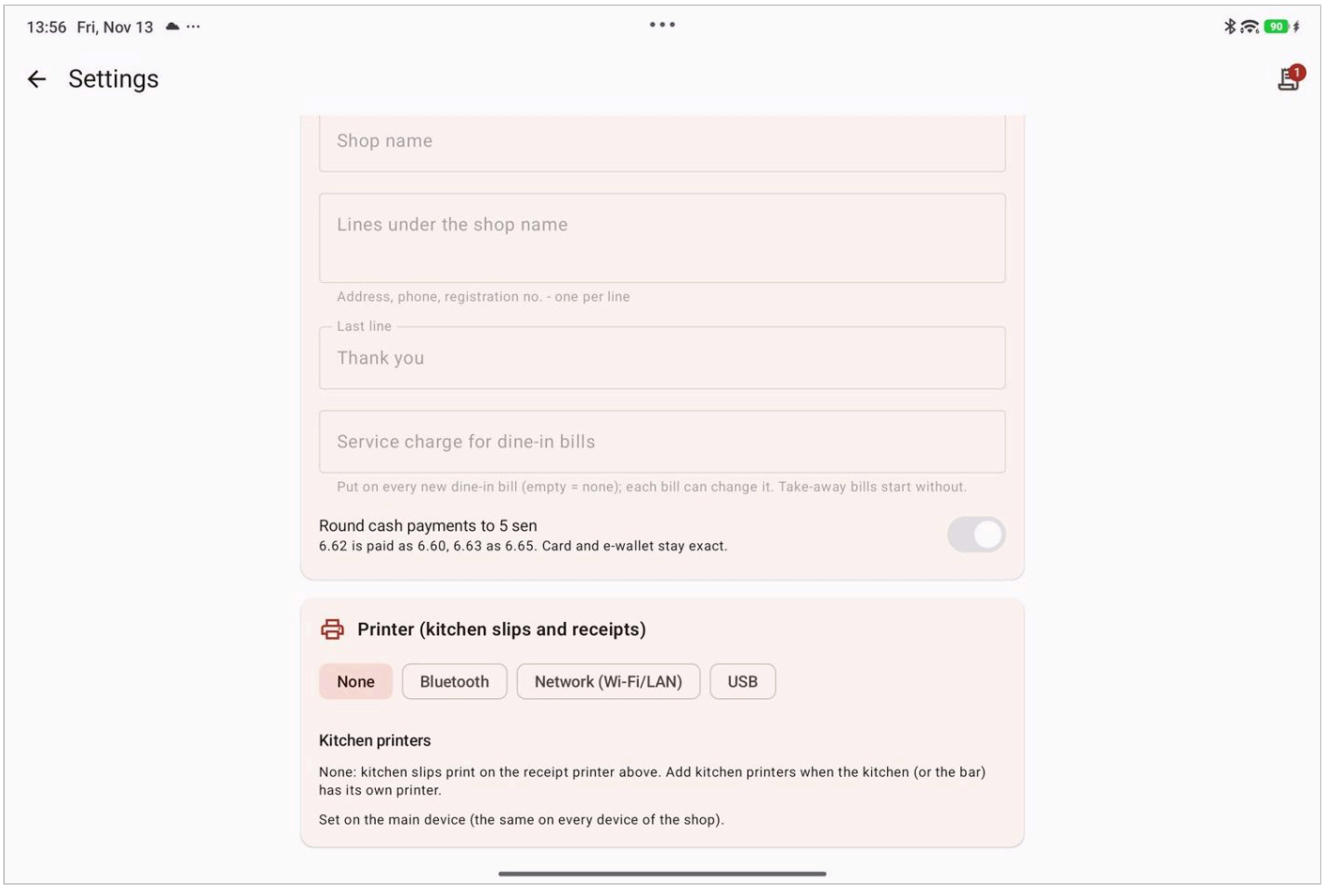

### 2. Open Settings

Tap the gear icon at the top right to open Settings.

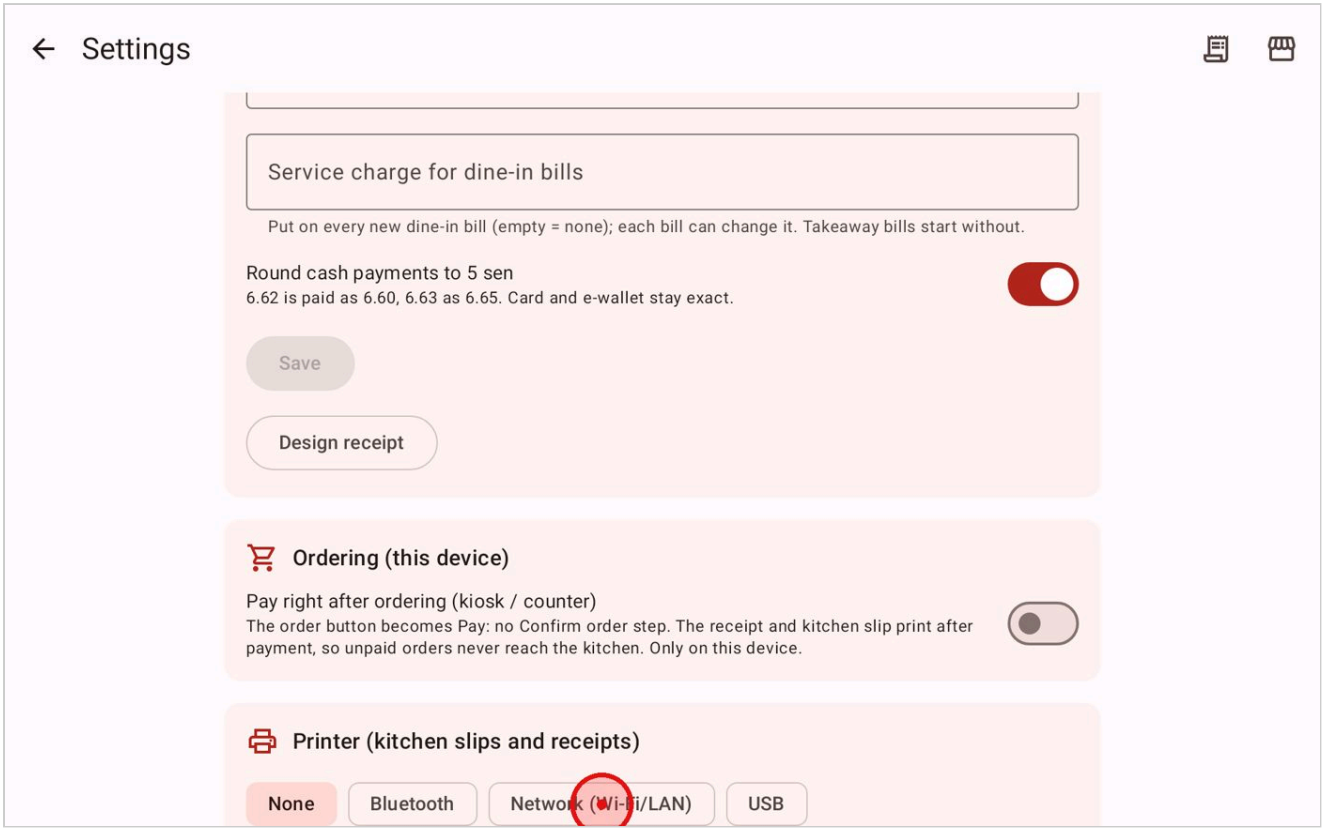

## 3. Find the Printer section

Open the group Receipt & printers and find Printer (kitchen slips and receipts).

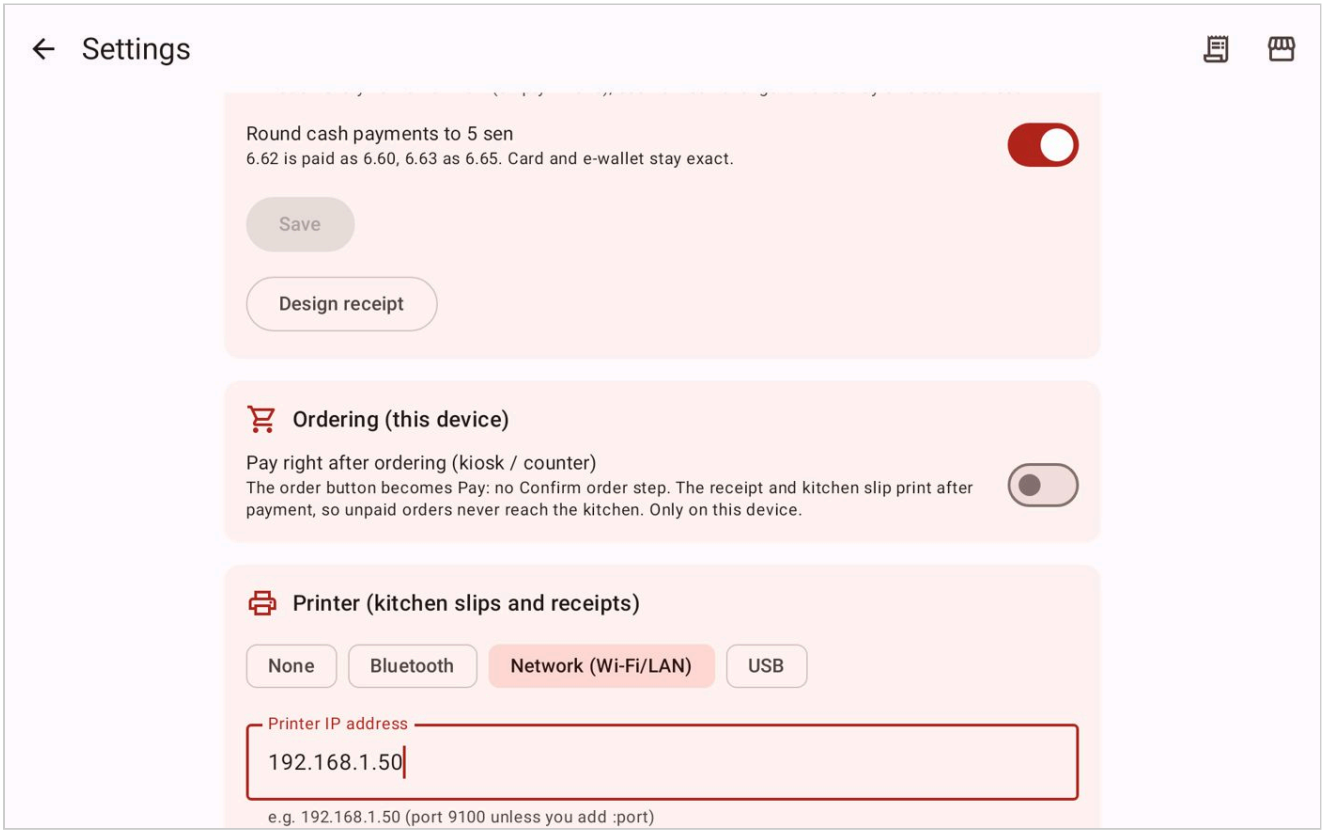

## 4. Choose Network (Wi-Fi/LAN)

Tap Network (Wi-Fi/LAN).

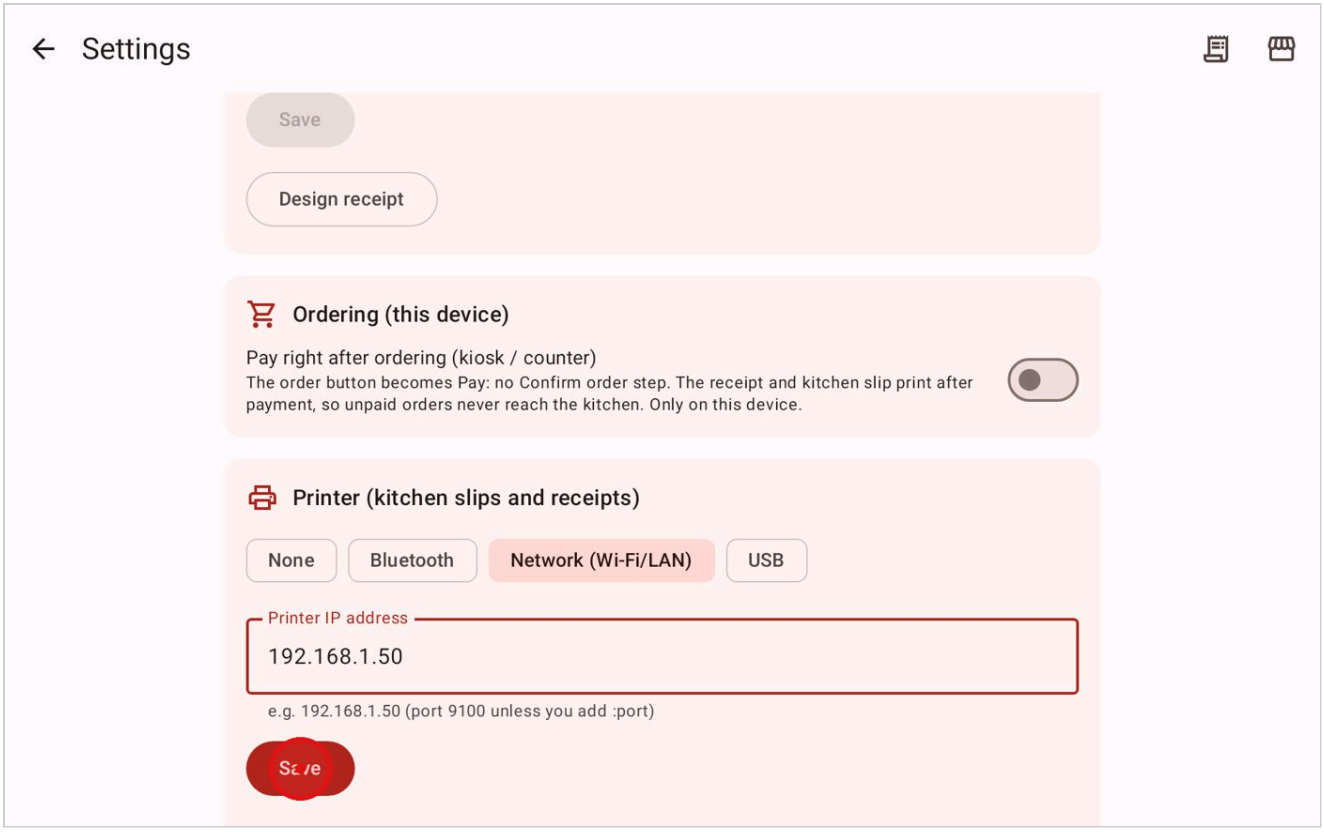

## 5. Type the IP address

Tap the Printer IP address box and type your printer's IP address, for example 192.168.1.50. The port is 9100 unless you add :port.

## 6. Save

Tap Save.

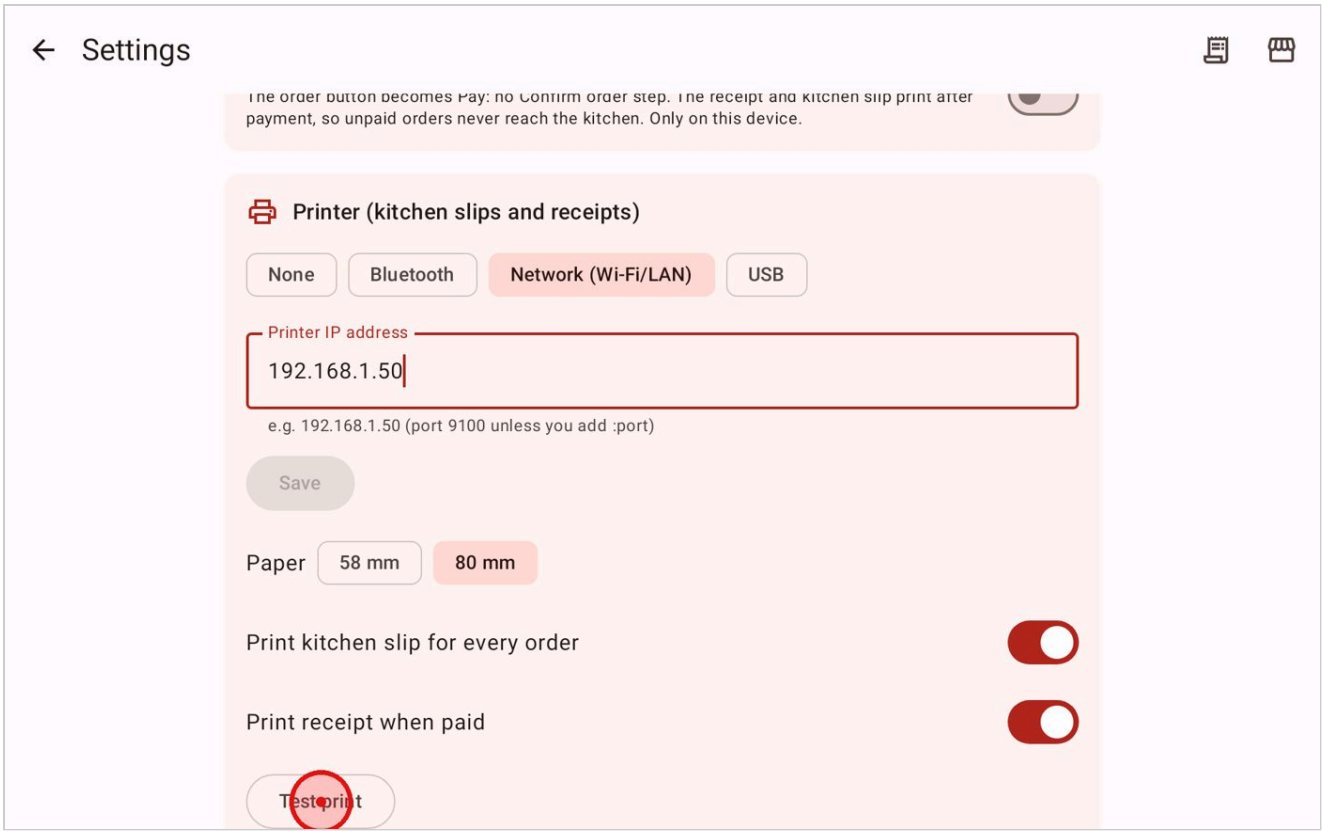

## 7. Find Test print

Scroll down to Test print. You can also choose the Paper size here: 58 mm or 80 mm.

## 8. Print a test slip

Tap Test print. A test slip should print.

## Tips

- Paper is 58 mm or 80 mm. Pick the size that matches your printer's paper roll.
